

Manasa Jampani — EB-2 NIW (National Interest Waiver) Petition

Petitioner: Manasa Jampani

Classification: EB-2 NIW (National Interest Waiver — Dhanasar Framework)

Company: Ardia Health Labs (Argyle, TX 76226)

Date Prepared: June 2026

About Manasa Jampani

Manasa Jampani is the Co-Founder & CEO of Ardia Health Labs. She brings a unique combination of payer-side insider knowledge and startup leadership that is irreplaceable for the company's mission. Having worked inside payer and payer-adjacent organizations, she has direct operational knowledge of how payer clinical operations teams configure AI denial systems — the very systems that the DGP architecture is designed to defeat.

- **Total IT Experience:** 10+ years
 - **Healthcare IT Experience:** 5+ years
 - **Prior Employers:** Interwell Health, United HealthGroup, ECFMG
 - **Domain Expertise:** Clinical operations, payer strategy, ACO operations, renal care management, AI background, investor relations, GTM
 - **Contact:** founders@ardiahealthlabs.com | (469) 499-6435

EB-2 NIW Assessment — Dhanasar Framework (All 3 Prongs STRONG)

Prong	Status	Summary
Prong 1: Substantial Merit & National Importance	✓ STRONG	\$10-12B problem, 35.3% denial rate, 7,000+ labs at risk
Prong 2: Well Positioned to Advance the Endeavor	✓ STRONG	5+ years inside payer clinical ops — knowledge no competitor has
Prong 3: Beneficial to US to Waive Labor	✓ STRONG	No comparable platform; serving rural/underserved communities

Prong	Status	Summary
Certification		
NIW Verdict: STRONG CASE — all three Dhanasar prongs satisfied with documented evidence.		

Manasa's Unique Competitive Advantage

No other person developing independent laboratory billing AI has Manasa's insider knowledge of how payer clinical operations teams configure denial algorithms. This is not a matter of degree — it is a categorical advantage:

- Payer denial systems are NOT publicly documented
- Payer AI configuration decisions are proprietary to each payer organization
- The only way to understand payer denial logic from the inside is to work inside payer clinical operations — which Manasa did at United HealthGroup and Interwell Health

This makes her paper (Paper 4: "Inside the Payer AI Black Box") uniquely publishable in NEJM AI, where no other author could provide this perspective from the same vantage point.

Contents of This Repository

Papers (for EB-1A C6 / NIW merit evidence)

- papers/paper4_payer_ai_insider.md — Manasa's unique paper (submit to NEJM AI / Health Affairs)
- papers/paper2_lab_revenue_crisis.md — Co-authored with Ram (systematic review)
- papers/paper3_ai_governance_sb1188.md — Co-authored with Ram (Texas AI governance)

Citations

- citations/reference_library.md — Full citation library (same as Ram's; shared by both papers)

Visa Evidence

- visa_evidence/eb2niw_dhanasar_analysis.md — Full three-prong legal argument
- visa_evidence/niw_petition_narrative.md — Draft I-140 cover letter / petition narrative

- [visa_evidence/expert_witness_letter_templates.md](#) — Expert witness letter templates for Manasa

Submission Guides

- [submission_guides/nejm_ai_submission_guide.md](#) — NEJM AI + Health Affairs submission guide

Priority Action Timeline

Week	Action	Impact
This week	Write Paper 4 abstract; email NEJM AI with inquiry	Start publication record
2 weeks	Publish 2 LinkedIn long-form articles on payer AI + ACO operations	Published material for NIW evidence
4 weeks	Submit Paper 4 to medRxiv (preprint) for immediate publication record	NIW Prong 2 + merit
4 weeks	Submit Paper 2 (co-authored with Ram) to arXiv	Additional publication record
6 weeks	Apply AMIA + HIMSS membership	Association membership
Q2 2026	Document pilot results at HealthTrackRx	Strongest NIW Prong 2 evidence
