

arXiv Preprint Submission Guide

Rambabu Vadlamudi — Paper 1 (DGP Architecture)

Target URL: <https://arxiv.org/submit>

Timeline: Preprint goes live 1-2 business days after submission

EB-1A Impact: Satisfies Criterion 6 (Scholarly Articles) — USCIS accepts arXiv preprints

Why arXiv First

- arXiv preprints are accepted as Criterion 6 evidence by USCIS without requiring journal peer review acceptance
 - arXiv goes live in 1-2 business days — build your Criterion 6 record NOW, not in 6 months
 - Simultaneous journal submission is allowed after arXiv posting (submit to JAMIA immediately after)
 - arXiv papers are indexed by Google Scholar — citations begin accumulating immediately
 - arXiv is the standard first-publication venue in computer science and biomedical informatics
-

Step-by-Step Submission

Step 1 — Create an arXiv Account

1. Go to <https://arxiv.org/user/register>
2. Register with your institutional email (use ram.vadlamudi@ardiahealthlabs.com)
3. You will need an endorser for your first submission in cs.AI — see Step 6

Step 2 — Prepare Your PDF

- Convert the `paper1_dgp_architecture.md` file to a formatted PDF
- Recommended: Use LaTeX (Overleaf.com — free) with the standard article template
- Alternative: Microsoft Word → PDF, ensuring professional formatting
- Target length: 8-15 pages (conference/journal format)
- Required sections: Abstract, Introduction, Methods/Architecture, Results/Discussion, Conclusion, References

Step 3 — Submission Form

Navigate to: <https://arxiv.org/submit>

Submission type: New Submission

Primary Category: cs.AI

Cross-list categories: - cs.IR (Information Retrieval) - q-bio.QM (Quantitative Methods — for the healthcare/quantitative aspects)

Title (copy exactly):

DGP (Deterministic-Generative-Predictive) Clinical Revenue Architecture for Healthcare Revenue Cycle Management: Combining Deterministic Policy Engines, LLM Clinical Reasoning, and ML Denial Prediction for Independent Laboratory Claim Recovery

Authors:

Rambabu Vadlamudi (Ardia Health Labs)

Abstract (350 words — from paper1_dgp_architecture.md): Copy the abstract section from the paper draft. Ensure it is ≤ 1920 characters.

Comments field:

15 pages, 1 figure. Technical report. Submitted for journal consideration.

Report number: Leave blank

Step 4 — Upload Files

Option A (LaTeX): - Upload .tex source file - Upload any figure files (.png, .pdf) - arXiv compiles LaTeX automatically

Option B (PDF): - Upload single PDF file - arXiv accepts direct PDF submission

Step 5 — Endorsement

For first-time submitters to cs.AI, arXiv requires an endorser — someone who has previously published in cs.AI on arXiv.

How to get endorsed: 1. Email a computer science faculty member at any university who has arXiv cs.AI papers 2. Subject: “arXiv cs.AI Endorsement Request — Healthcare Revenue Cycle AI Paper” 3. Include: your paper title, abstract, and arXiv account username 4. Most faculty respond within 48 hours

Fastest path: Contact UT Southwestern Medical Center informatics faculty or any DFW-area CS faculty. Alternatively, a former colleague at one of your

prior employers (CIGNA, Teladoc Health, UHC) with arXiv papers can endorse.

Step 6 — Submit

After endorsement is received: 1. Return to arXiv.org → My Submissions 2. Complete the submission (endorsement unlocks the Submit button) 3. You will receive a confirmation email with your arXiv ID (e.g., arXiv:2026.XXXXX)

Step 7 — Save Your arXiv ID

Your arXiv ID is your EB-1A Criterion 6 evidence identifier.

Example: arXiv:2026.12345 [cs.AI]

Save this ID and include it in: - Your EB-1A petition evidence package - All subsequent papers (cite Paper 1 in Papers 2, 3, and 4) - Your USCIS filing (print the arXiv listing page as evidence)

Simultaneous JAMIA Submission

After arXiv posting, submit to JAMIA (Journal of the American Medical Informatics Association):

JAMIA manuscript portal:

https://academic.oup.com/jamia/pages/General_Instructions **Editor email:** jamia@amia.org **Review timeline:** 4-8 weeks to first decision **Impact factor:** ~7.0 (2024)

Cover letter template:

Dear JAMIA Editor,

I am submitting the manuscript "DGP (Deterministic-Generative-Predictive) Clinical Revenue Architecture..." for consideration as an Original Research article.

This manuscript presents a novel three-layer hybrid AI architecture for independent laboratory claim denial recovery – the first published architecture applying this design to the healthcare administrative domain (as distinct from clinical decision support). The work addresses an estimated \$10–12 billion annual revenue loss documented in JAMA Network Open (2025) and XiFin (2024).

A preprint of this manuscript is available on arXiv [arXiv ID]. The manuscript has not been submitted elsewhere for publication.

I declare no conflicts of interest. No external funding was received.

Sincerely,
Rambabu Vadlamudi
Ardia Health Labs
ram.vadlamudi@ardiahealthlabs.com
(469) 679-3334

After Publication — Immigration Use

What to include in EB-1A petition: 1. Print the arXiv listing page (shows your name, title, abstract, submission date, paper ID) 2. Print the full paper PDF 3. Include Google Scholar citation count once citations accumulate 4. Print any comments, downloads, or endorsements received

Timeline note: For immigration filing purposes, the arXiv submission date is the “publication” date. USCIS counts preprints as scholarly publications under Criterion 6.
