

EB-1A Criteria Evidence Map

Rambabu Vadlamudi — Ardia Health Labs

Need: 3 of 10 criteria

Current strong criteria: C5 (original contributions), C8 (leading role)

Build to 3rd: C6 via arXiv preprint — can be satisfied THIS WEEK

Criterion 5 — Original Scientific, Scholarly, Artistic, Athletic, or Business Contributions of Major Significance

STATUS:  STRONG — File Now

Evidence

1. DGP (Deterministic-Generative-Predictive) Clinical Revenue

Architecture - Inventor: Rambabu Vadlamudi - Architecture name is Ram's original coinage — not used in any prior published work - Documented in white paper (March 2026) and investor pitch deck v2 - Three-layer design: 847-rule deterministic policy engine + LLM clinical reasoning + ML denial prediction - First published architecture applying hybrid AI to healthcare ADMINISTRATIVE automation (claim recovery), distinct from all prior hybrid AI healthcare papers which address clinical DIAGNOSIS - Processing performance: Appeal briefs in <90 seconds; 14 medical database retrieval in 340ms

2. 847-Rule Symbolic Policy Engine - Covers all LCD/NCD/MolDX policies, DEX Z-codes, CPT 81400-81479 genomic sequencing codes, PLA codes - Novel implementation: no comparable rule engine for independent laboratory molecular diagnostic billing exists in any commercial or open-source system - Achieves zero hallucination on policy interpretation — critical safety property for healthcare billing AI

3. Problem Significance - Addresses \$10-12 billion annual preventable revenue loss - Molecular diagnostics denial rate 35.3% — highest in healthcare (XiFin 2024, 20M+ claims) - Independent labs face 2.76× higher denial odds vs. hospital labs (JAMA Network Open 2025, n=29,919) - 7,000+ CLIA-certified independent labs at financial risk from PAMA 2027 + systematic denial

4. Expert Witness Corroboration - See

expert_witness_letter_templates.md for letter templates from lab directors, Google Cloud healthcare team, Anthropic

Priority Actions

- Submit Paper 1 (DGP Architecture) to arXiv cs.AI — establishes documented original contribution
 - Secure expert witness letters from HealthTrackRx pilot lab director after Q2 2026 pilot launch
-

Criterion 8 — Leading or Critical Role in Distinguished Organizations

STATUS:  **STRONG — File Now**

Evidence

Ardia Health Labs - Role: Founder & Enterprise Architect - Entity: Delaware LLC, incorporated January 2026 - Headquarters: Argyle, TX 76226 - Infrastructure: Google Cloud Platform with HIPAA BAA - Certification roadmap: HITRUST CSF, SOC 2 Type II - Target financing: \$3.5M Seed at \$18M valuation cap - Status as of March 2026: Platform architecture 100% complete; pilot launch Q2 2026

Prior Organizations (Distinguished Organizations) - Alsac / St. Jude Children's Research Hospital — one of the most recognized pediatric cancer research institutions in the world; healthcare IT architect role - **CIGNA** — Fortune 15 health insurance company; healthcare IT architect role - **Teladoc Health** — publicly traded telehealth leader; healthcare IT role - **United Health Care** — largest health insurer in the US (Fortune 7); healthcare IT role - **ECFMG** — Educational Commission for Foreign Medical Graduates; healthcare IT role - **Medifast** — publicly traded health & wellness company; healthcare IT role

Note on Organizational Distinction

USCIS rates this criterion on the distinction of the organization, not just the title. Employment at Alsac/St. Jude, CIGNA, UnitedHealthCare, and Teladoc Health provides strong prior evidence of being entrusted with critical roles at distinguished organizations.

Priority Actions

- Document each organization's distinction: market cap, industry ranking, number of employees, annual revenue
 - Obtain recommendation letters from supervisors at prior employers (especially St. Jude/Alsac, UHC, CIGNA)
-

Criterion 6 — Authorship of Scholarly Articles in Professional Journals or Major Media

STATUS: ⚠️ **GAP — Action Required THIS WEEK**

Evidence (After arXiv Submission)

- **Paper 1:** DGP Architecture paper (Ram as lead author) — submit to arXiv cs.AI this week
- **Paper 2:** Independent Lab Revenue Crisis systematic review (Ram + Manasa) — submit after Paper 1
- **Paper 3:** AI Governance SB 1188/TRAIGA paper (Ram + Manasa) — 4–6 weeks
- arXiv preprints are accepted as Criterion 6 evidence per USCIS practice

Note

USCIS does NOT require journal acceptance for Criterion 6 — arXiv preprints satisfy the criterion. Do not wait for peer review; submit to arXiv immediately.

Priority Actions

1. **THIS WEEK:** Submit Paper 1 abstract + full draft to arXiv cs.AI
 2. **4 weeks:** Submit Paper 2 to arXiv q-bio.QM
 3. **8 weeks:** Submit Paper 3 to AHIMA or Health Affairs for peer review
 4. **After pilot launch:** Submit Paper 5 (pilot outcomes) — this will be the strongest piece
-

Criterion 4 — Participation as a Judge of the Work of Others

STATUS: ⚠️ **GAP — Action Required**

Opportunities (Ranked by Prestige for EB-1A)

1. NIH SBIR/STTR Study Section (Highest Prestige) - What: Review small business healthcare AI grant applications for NIH funding - How: Apply via csr.nih.gov → “Become a Reviewer” → request healthcare IT/AI study section - Timeline: Rolling; typically 3–6 months to first invitation - Contact: Program Officer at NIH Center for Scientific Review

2. JAMIA Peer Reviewer - What: Review submitted manuscripts for Journal of American Medical Informatics Association - How: Email editor@jamia.org — express interest as peer reviewer; list expertise: clinical AI, RCM, FHIR, healthcare administrative AI - Timeline: 1–2 weeks for

acknowledgment; first review request within 1–3 months - **Contact NOW:** editor@jamia.org

3. AMIA Annual Symposium Reviewer - What: Review abstracts/papers for American Medical Informatics Association annual conference - How: amia.org → member portal → volunteer reviewer - Timeline: Application window March–April annually; next cycle March 2027

4. HIMSS Conference Reviewer - What: Review educational session proposals for HIMSS annual conference - How: himss.org → content portal → reviewer application - Timeline: Q3 2026 for HIMSS 2027 conference

5. Health Wildcatters Demo Day Judge - What: Judge healthcare startup pitches at DFW accelerator Demo Day - How: healthwildcatters.com/mentor → application form - Timeline: Rolling; accelerator cycle is 4 months - Bonus: Judging generates press coverage (satisfies Criterion 3)

6. SXSW Health Track Judge - What: Judge healthcare innovation showcases at SXSW Austin - How: Apply via SXSW PanelPicker; note: easier to get invited after some press coverage

Priority Actions

1. **THIS WEEK:** Email editor@jamia.org — one paragraph introduction + reviewer offer
 2. **THIS WEEK:** Apply to NIH SBIR study section via csr.nih.gov
 3. **3 months:** Follow up on JAMIA application; apply to Health Wildcatters judge panel
-

Criterion 3 — Published Material About the Person

STATUS: ⚠ **GAP — Action Required**

Target Publications

Tier 1 (Highest EB-1A Value) - Becker's Hospital Review — editor at becker@beckershealthcare.com; pitch angle: “DFW Founder Builds AI to Save Independent Labs from \$12B Billing Crisis” - **STAT News** — pitch angle: “PAMA 2027 threatens 7,000 labs — one healthcare AI founder's answer” - **Modern Healthcare** — healthcare business press; pitch PAMA 2027 + AI angle - **Health Affairs Blog** — policy angle: state AI governance laws + independent lab crisis

Tier 2 (Regional/Industry) - Dallas Business Journal — local business press - **Becker's Health IT** — IT-specific healthcare press - **MedCity News** — healthcare startup press - **Healthcare IT Today** — industry trade press; Ram's technical expertise angle

Tier 3 (Generates Press Upon Acceptance) - Health Wildcatters accelerator acceptance — generates DFW press automatically - **Google Cloud for Startups showcase** — generates technology press - **Techstars Physical Health Fort Worth** — if accepted, generates startup press

LinkedIn Articles (Indexed by Google = “Published Material”)

USCIS accepts LinkedIn long-form articles indexed by Google as “published material” per practice.

Recommended Article Topics for Ram: 1. “Why Independent Clinical Labs Are Losing \$12 Billion Annually — And How AI Can Stop It” 2. “MolDX Compliance for AI Systems: What Healthcare AI Developers Get Wrong” 3. “Texas SB 1188 and TRAIGA: Building the First Compliant Healthcare Revenue AI in the Lone Star State” 4. “The DGP Architecture: Why Deterministic Rules Must Come Before LLMs in Healthcare Billing AI”

Priority Actions

1. **2 weeks:** Write and publish 2 LinkedIn long-form articles (indexed within 1 week of publication)
 2. **4 weeks:** Pitch Becker’s Hospital Review with press release + pitch email
 3. **6 weeks:** Apply to Health Wildcatters accelerator (generates press on acceptance)
 4. **Ongoing:** Monitor Google News for PAMA 2027 stories — offer expert commentary to journalists
-

Criterion 2 — Membership in Associations Requiring Outstanding Achievement

STATUS: ⚠️ **GAP** — Action Required

Associations to Apply To (Ranked)

1. Forbes Technology Council - How: forbestechcouncil.com → apply online - Requirement: Peer-reviewed by current members; technology executive with demonstrated impact - Ram qualifies as: Founder of Ardia Health Labs, 15+ years IT, inventor of DGP architecture - Timeline: 4-6 weeks for review

2. HIMSS (Healthcare Information and Management Systems Society) — Fellow Track - How: himss.org → membership → Fellow application (CFCHE designation) - Requirement: Points system based on years in healthcare IT, publications, leadership, service - Ram qualifies on: 8+ years healthcare IT, employer history, DGP architecture contribution - Timeline: Application cycle; annual review

3. AMIA (American Medical Informatics Association) - How: amia.org → membership - Requirement: Work in medical informatics; Ram's FHIR/HL7/clinical AI work qualifies - Timeline: Rolling membership; apply now

4. American Clinical Laboratory Association (ACLA) - How: acla.com → membership - Requirement: Laboratory industry involvement; Ardia Health Labs serves independent labs - Timeline: Rolling

Priority Actions

1. **2 weeks:** Apply Forbes Technology Council online
 2. **4 weeks:** Submit HIMSS Fellow application with employer history + DGP architecture documentation
 3. **4 weeks:** Apply AMIA membership
-

Criterion 1 — Awards or Prizes for Excellence

STATUS: ⚠️ **GAP — Action Required**

Applications to Submit

1. Fast Company Most Innovative Companies in Healthcare - How: fastcompany.com/most-innovative-companies → application form (opens Q4 each year) - Pitch: First AI-native RCM platform for independent laboratory molecular diagnostics - Timeline: Applications typically open October–November; next cycle October 2026

2. Dallas Innovation Awards / DFW Tech & Innovation Awards - How: Search “Dallas Innovation Awards 2026” for current cycle - Timeline: Rolling / annual

3. ADLM (Association for Diagnostics & Laboratory Medicine) Awards - How: adlm.org → awards section → Innovation in Diagnostics - Timeline: Annual; check current cycle

4. Google Cloud for Startups Showcase - How: Google Cloud for Startups application - Ardia Health Labs already uses GCP + has HIPAA BAA — natural candidate - Timeline: Rolling

5. Techstars Physical Health Fort Worth - How: techstars.com → Physical Health Fort Worth - Note: Accelerator acceptance = award + press + investment

Priority Actions

1. **Rolling:** Submit to DFW Tech & Innovation Awards
2. **Q3 2026:** Apply ADLM Innovation in Diagnostics award
3. **Q4 2026:** Apply Fast Company Most Innovative Companies

4. **Q1 2027:** Apply Google Cloud for Startups showcase

Summary Filing Timeline

Immediate (This Week)	Satisfies
Submit Paper 1 to arXiv cs.AI	C6 — Publications
Email JAMIA editor re: peer reviewer	C4 — Judging
Apply NIH SBIR study section	C4 — Judging
2-4 Weeks	Satisfies
Apply Forbes Technology Council	C2 — Membership
Write 2 LinkedIn articles	C3 — Press
Apply HIMSS Fellow + AMIA	C2 — Membership
Pitch Becker's Hospital Review	C3 — Press
6-12 Weeks	Satisfies
Submit Papers 2 + 3 to arXiv	C6 — Publications (more)
Health Wildcatters application	C3 + C1
Apply DFW Tech & Innovation Awards	C1 — Awards

Recommended filing strategy: File EB-1A petition with C5 + C8 + C6 (after first arXiv publication) — that is 3 criteria and the minimum threshold. C4, C3, C2, C1 continue building in parallel, strengthening the petition record.
